Please leave our XM radio alone. For those of us that make our livings traveling over the country side servicing customers, XM is a blessing to have in our cars to pass the time on those long trips. It keeps us informed of possible safety hazzards from storms to traffic accidents. The programming offers us much more than the typical radio station that fades out after a few miles away from its broadcast area. Since we pay for the service, why should we be limited in what we hear. Please rejezt the NAB's petition 04-160.

Thank you,
John M. Mask
